

TOWN OF PORTSMOUTH

PUBLIC WORKSHOP

Thursday, October 7th, 2021 • 6:00-8:00pm

In-person: Town Council Chambers, 2200 E. Main Rd

OR

Virtual: via Zoom at livestream.portsmouthri.com/Resiliency

Climate Resiliency Planning & Financing Strategy Public Workshop: In response to the significant climate hazards (e.g., flooding, severe storms) that threaten Portsmouth's capital infrastructure and overall resilience, the Town is building on efforts to identify concerns and potential adaptations by working to refine its methods of prioritizing resilience infrastructure projects and to develop a sustainable financing strategy. The efforts of this project expand upon previous community-based resilience planning activities, such as the Municipal Resilience Program Workshop and Hazard Mitigation Plan.

Mark your calendar for October 7th from 6-8pm to participate in a public workshop hosted by the Town of Portsmouth to engage the community in development of the town's Climate Resilience Planning & Financing Strategy. Participants will be briefed on the draft prioritized list of resilience capital infrastructure improvement projects and other findings of the climate resilience planning and financing project developed by the Town of Portsmouth and members of the Climate Resilience Workgroup (CRWG) with assistance from the [SNEP Network](#) Project Team. Interested persons can participate in-person at the Portsmouth Town Council Chambers or virtually via ZOOM.
